DECnet/SNA VMS APPC/LU6.2 Programming Interface Version 2.2

AV-KQ77C-TE

October 1990

Dear Customer:

This package contains the DECnet/SNA VMS APPC/LU6.2 Programming Interface Version 2.2 software and user documentation. Please check the Bill of Materials to see that all items listed are in your distribution kit. If any items are missing or damaged, please contact your Digital representative.

The DECnet/SNA VMS APPC/LU6.2 Programming Interface documentation set includes the following:

- *DECnet/SNA VMS APPC/LU6.2 Programming Interface Installation*
- *DECnet/SNA VMS APPC/LU6.2 Programming Interface Programming*

If you need to order any additional documentation, you can contact your Digital sales representative or refer to the ordering information in the *Software Documentation Products Directory*.

The Programming Interface release notes are on line as part of the distribution kit. You should read or print the release notes, as they may contain changes to the installation procedure. To do this, specify OPTIONS N when you start VMSINSTAL:

```
$ @SYS$UPDATE:VMSINSTAL SNALU62022 ddcu:  OPTIONS N
```

where:

SNALU62022	is the product name.
ddcu	refers to your storage device, for example, MUA0.
OPTIONS N	allows you to display or print the release notes. As part of the installation, VMSINSTAL will also copy them to SYS$HELP. You can access them in the future under the filename SYS$HELP:SNALU62022.RELEASE_NOTES.
