DECview3D Version 2.1 Cover Letter
AV–PBJXB–TE

Dear DECview3D user,

Enclosed is the new version of DECview3D. Please take a moment to read the following information before installing the DECview3D Version 2.1 software.

Release Note Information

The release notes for DECview3D Version 2.1 contain information on known restrictions. You can locate them after installing DECview3D by entering the following command:

```
$ HELP DECVIEW3D RELEASE_NOTES
```

Key New Features

- Improved IGES translator adds support for additional entities.
- Application Command Line option.
- Ability to create, edit, and replay DECview3D sessions through Script files. This feature is useful for commonly repeated tasks such as batch file translation.
- Custom settings can now be stored in DECview3D initialization files so that they are automatically defined at the start of each session.
- Mouse support on VT300-series terminals. On VT200-series terminals and VT300-series terminals with no mouse, user interaction occurs through the Application Command Line interface only.
- Entity blanking for clarifying complex graphics displays.
- Analysis of distance between part entities.
- Color PostScript and Encapsulated PostScript formats are supported.

If you have any questions about DECview3D Version 2.1, please contact the Digital Customer Support Center at 1–800–332–8000.

Regards,
DECview3D Product Management
