Cover Letter for VAX Decision Expert Software
AV–LW66A–TE

April 1989

DIGITAL is pleased to announce VAX Decision Expert software V1.0. This release requires the installation of VMS V5.1. It also requires the VMS DECwindows desktop environment. Refer to the VAX Decision Expert V1.0 Release Notes for other specific resource requirements.

Documentation

VAX Decision Expert Version 1.0 documentation includes the following:

- The *VAX Decision Expert Version User Manual*, which describes the features, concepts, and procedures users need in order to build applications using VAX Decision Expert software.
- The *VAX Decision Expert Reference Manual*, which describes
  - Commands used with the entry screen
  - Commands for editing tables and trees
  - The utility language
  - Commands for window manipulation
  - Related DCL functions
- The *VAX Decision Expert Installation Guide*, which describes how to install and verify the VAX Decision Expert software.
- The *VAX Decision Expert Reference Card*, which gives a listing of all the keys and commands used during application development.
- The *VAX Decision Expert Release Notes*, which describes the restrictions, changes in the documentation, and software.

Installation

Installation of VAX Decision Expert Version 1.0 requires that your system be running VMS Version 5.1 and VMS DECwindows. If you are running any other version of VMS, you need to update it. Refer to the *VMS Version 5.1 Installation Guide* for details on how to update your system. Note that this software does not conform to the *XUI Style Guide*.
