Software Product Description

PRODUCT NAME: VAXft System Services, Version 1.2 **SPD 31.64.02**

DESCRIPTION

VAXft System Services is a VMS layered software product. When combined with base VMS and the VAXft series hardware, VAXft System Services provides the full fault tolerant system capabilities. The resulting features include the following:

- Automatic failover
- Configuration management
- Automatic dial-out notification
- Component fault isolation and recovery
- Optional support for the DSF32-AA/AB

VAXft System Services software is used by System Managers, Operations, and Digital Service personnel to perform system management and maintenance operations. The software is transparent to the system users as well as to VMS layered products and applications.

HARDWARE REQUIREMENTS

VAXft configuration as specified in the System Support Addendum (SSA 31.64.02-x).

SOFTWARE REQUIREMENTS

For Systems Using Terminals (No DECwindows Interface):

VMS Operating System

Refer to the System Support Addendum (SSA 31.64.02-x) for availability and required versions of prerequisite /optional software and for information regarding components of VMS DECwindows.
