VAX DECalc-PLUS Version 3.1 Cover Letter

Order No.: AV-PCKWA-TE

Enclosed is the VAX DECalc-PLUS Version 3.1 Kit. The kit includes documentation and software for VAX DECalc-PLUS.

The kit contains fixes to problems found in Version 3.0A and additional features documented in the *VAX DECalc-PLUS Release Notes*.

The kit contains the following items:

- This cover letter
- The Version 3.1 installation media
- *VAX DECalc-PLUS Installation and System Manager's Guide*
- *VAX DECalc-PLUS Release Notes*

To install the kit, read the release notes and then follow the procedure in the *VAX DECalc-PLUS Installation and System Manager's Guide*

Highlights of Version 3.1 include the following:

- DECalc-PLUS now uses the License Management Facility (LMF)
- DECalc-PLUS now supports VT300 series terminals
- DECalc-PLUS now uses an optional method for selecting grids, tables, and commands
- DECalc-PLUS now carries over protection schemes and ACLs from one grid version to the next
- Grids without views or grids with up to 24 views are compatible between Versions 3.0A and 3.1
- The DEP function now requires dbal instead of db

See the *VAX DECalc-PLUS Release Notes* for details about these highlights and for information about changes and new features, resolved problems, problems and restrictions, and documentation changes in Version 3.1.
