DECnet/SNA VMS Gateway Management, Version 2.1

digital™

AV–LU46B–TE
July 1990

Dear Customer:

Please take a few moments to read the following information about your DECnet/SNA VMS Gateway Management Version 2.1 distribution kit.

This package contains the DECnet/SNA VMS Gateway Management Version 2.1 software and user documentation. Check the Bill of Materials to see that your distribution kit contains all of the listed items. If any items are missing or damaged, contact Digital Equipment Corporation.

The DECnet/SNA VMS Gateway Management documentation set includes the following manuals:

- *DECnet/SNA VMS Gateway Management Installation*
- *DECnet/SNA VMS Gateway Management Management*

If you need to order additional documentation, contact your Digital sales representative or refer to the ordering information in the *Software Documentation Products Directory*.

The DECnet/SNA VMS Gateway Management release notes for Version 2.1 are on line as part of the distribution kit. You can access the release notes during the installation procedure by specifying OPTIONS N when you invoke VMSINSTAL:

```
$ @SYS$UPDATE:VMSINSTAL SNAGM021 ddcu: OPTIONS N
```

If you use OPTIONS N with VMSINSTAL, you will be asked whether you want the release notes displayed, printed, or both. You can also specify the print queue name.

If you do not use OPTIONS N with VMSINSTAL, you can type or print the file SYS$HELP:SNAGM021.RELEASE_NOTES after the installation.

The License Management Facility (LMF) requires registering and loading the Product Authorization Key (PAK) prior to starting the Gateway Management software. The Service Update PAK (SUP) sheet that is shipped with the Gateway Management product contains the license registration information.

Digital prides itself on responding to customer needs. In order to continue serving you, we need your comments. Each manual contains a preaddressed, postpaid Reader's Comments form at the back. If you find errors in a manual or want to make comments, please complete and return this form.
