DECnet/SNA VMS Remote Job Entry Version 1.4

AV–KZ48B–TE

June, 1989

Your DECnet/SNA VMS Remote Job Entry Version 1.4 software and user documentation, including installation instructions, are included in this package.

- The bill of materials specifies the number and contents of your distribution kit. Check to see that all items are in your kit. If any items are missing or damaged, contact your Digital Equipment Corporation representative.
- Make sure you have installed Version 5.0 or 5.1 of the VMS operating system.
- Read *DECnet/SNA VMS Remote Job Entry Version 1.4 Installation* before you install the software.

Be sure to read the release notes carefully. Included in the release notes you will find complete details of the following important changes:

- The SET WORKSTATION command has a new qualifier, /SERVER, which allows you to run RJE through SNARJE$SERVER on a VMS node instead of through the RJE server on the Gateway.
- The VMS SNARJE$SERVER now supports a maximum RU size of 3840 for printer and punch streams.
- After installation, SYS$LIBRARY contains two new command procedures, SNARJE$RJESYMBOL.COM and SNARJE$RJSSYMBOL.COM. These command procedures contain the symbolic values of the RJE status return codes.
- RJE V1.4 permits queue names up to 31 characters.
- RJE V1.4 supports command line recall.
- The SERVER and MPX log file names now have the RJE facility code prefix SNARJE$.
- SYS$EXAMPLES contains a new command procedure, SNARJE$AUTORJE.COM, which provides an example of RJE automation.
