VAX Xway V1.2 Cover Letter

Order No.: AV-PDZTA-TE

Enclosed is the VAX Xway Version 1.2 Kit. The kit includes documentation and software for VAX Xway.

The kit contains fixes to problems found in V1.1A and additional features documented in the *VAX Xway V1.2 Release Notes* which may be found on-line, in the installation kit.

The kit contains the following items:

- This cover letter
- The Version 1.2 installation media
- *VAX Xway V1.2 Installation Guide*

To install the kit, please follow the procedure in the *VAX Xway V1.2 Installation Guide*.

Highlights of Version 1.2 include the following:

- VAX Xway now supports DECalc V3.1 input and output files.
- VAX Xway now uses the License Management Facility (LMF).
- VAX Xway now provides better recovery from "unsupported record type" errors.
- VAX Xway now provides support for ADA and BASIC programming using the callable interface routines.
- VAX Xway V1.2 provides two new callable interface routines.
- VAX Xway V1.2 provides two examples for programming using the callable interface routines.

See the *VAX Xway V1.2 Release Notes* for details about these highlights and for information about changes and new features, resolved problems, problems and restrictions and documentation changes in Version 1.2.
