

HP OpenVMS Common Internet File System (CIFS) Version 1.1 ECO1 Cover Letter

March 2009

Dear Customer,

Hewlett-Packard is pleased to announce the release of HP OpenVMS CIFS for OpenVMS Alpha and OpenVMS Integrity servers Version 1.1 ECO1.

HP OpenVMS Common Internet File System (CIFS) provides users with seamless file and print interoperability between OpenVMS and Windows-based clients. HP CIFS V1.1 ECO1 is supported on OpenVMS Alpha versions 8.2 and above and OpenVMS Integrity versions 8.2-1 and above. HP CIFS Server Version 1.1 ECO1 is also supported on Windows 2008.

License Information

HP CIFS is provided at no additional charge for users with a valid license to operate an OpenVMS operating system for an Integrity server or AlphaServer system.

The Samba technology *utilized* in CIFS is bound by an opensource software license.

Documentation

HP OpenVMS CIFS Administrator's Guide, Migration Guide and Release Notes are available in Postscript, PDF, and Text formats on the web.

For More Information

If you have questions regarding HP CIFS software, please see the following website for the most current and up to date information in support of our products:

http://h71000.www7.hp.com/network/CIFS_for_Samba.html

Thank you for choosing HP OpenVMS CIFS software as your networking solution. As always, we welcome your feedback.
