Order Number: AV-PJK1A-TE

ALL–IN–1 V2.4D

COVER LETTER

Introduction

ALL–IN–1 V2.4-1 also known as ALL–IN–1 V2.4 UPDATE Version 2.0 contains one saveset. It does not make any changes to language-dependent parts of ALL–IN–1 Version 2.4. Though the installation does require that the system manager execute a post-installation command file to ensure that language-dependant functionality is updated.

Install this update kit using VMSINSTAL. You do NOT need to install any previous patches or Update kits (this is the first Update released by ALL–IN–1 Engineering), before you install this update kit.

The Release Notes included in the Update kit contain:

- Details of the problems fixed by this Update
- Details of any hardware and software required
- Disk space requirements for this Update
- Sample installation and deinstallation procedures

Accessing the Online Release Notes

To obtain a copy of the Release Notes:

1. Specify OPTIONS N in the VMSINSTAL command:

   $ @SYS$UPDATE:VMSINSTAL A1024SUS020 dev: OPTIONS N

   where 'dev' is the name of the device on which the distribution media is to be mounted.

2. After you have mounted the distribution media, VMSINSTAL displays the following prompt:

   Additional Release Notes Options:

   1. Display release notes
   2. Print release notes
   3. Both 1 and 2
   4. None of the above

* Select option [2]:

Enter the number of the option you require.

You can choose to discontinue the installation procedure at this point.

After you have installed the update, the Release Notes are stored in the file SYS$HELP:A1024SUS020.RELEASE_NOTES.

NOTE 1

The Update kit makes changes to the command dispatch mechanism. These changes make all pre-compiled forms libraries (.FLC files) obsolete. It is therefore essential that the installer re-compiles ALL previously compiled FORM and TEXT libraries (.FLCs and .TXLs) for both the base product and any additional Layered Products, ASSETs or third party vendors software which are integrated into ALL–IN–1. This is fully covered in the on-line release notes - please read these carefully before commencing installation.

NOTE 2

If you are planning to install the WPS–PLUS V4 OPTION kit then you must

1. install this kit (ALL–IN–1 V2.4 UPDATE V2.0) first,
2. complete the post-installation operations
3. check that you have have a fully operational ALL–IN–1 system

before installing the WPS–PLUS V4 OPTION.

NOTE 3

If you have ALL–IN–1 Services for DECwindows V1.0 installed, or plan to install this kit at a later date, then you will have to make the following correction to the file MICA$LIB_SHARE:MICA$PUB.SCP before you attempt to execute the products post-installation procedures.

Change line 12 as follows:

from: .IF OA$PROFIL_PRVAPP NEQ 0 THEN .GOTO OK_AUTHORITY
to: .IF OA$PROFIL_PRVAPP NE 0 THEN .GOTO OK_AUTHORITY
