Processor Restrictions

A TK50 Tape Drive is required for standalone Microvax 2000 and VAXstation 2000 systems.

For MicroVAX II and VAXstation II systems:

- Minimum — an RD53 disk drive for system disk

For VAX ACMS and VAX ACMS Run-time Option:

- At lease 4MB of memory (A typical configurations may require more memory.)

For VAX ACMS Remote Access Option:

- At least 2MB of memory (typical configurations may require more memory).

Other Hardware Required

Disk Space Requirements (Block Cluster Size = 1):

Development System

Disk space required for installation:	18,800 blocks (9.6M bytes)
Disk space required for use (permanent):	15,800 blocks (8.1M bytes)

Run-time Option

Disk space required for installation:	17,400 blocks (9M bytes)
Disk space required for use (permanent):	15,200 blocks (7.8M bytes)

Remote Access Option

Disk space required for installation:	10,500 blocks (5.4M bytes)
Disk space required for use (permanent):	8,800 blocks (4.5M bytes)

These counts refer to the disk space required on the system disk. The sizes are approximate; actual sizes may vary depending on the user's system environment, configuration, and software options.
