Software Product Description

PRODUCT NAME: VMS DECwindows [language variant] V2.1 **SPD 00.00.00**

DESCRIPTION

VMS DECwindows [language variant], is the [language variant] language interface to the VMS DECwindows product. VMS DECwindows is included with the VMS Operating System. A prerequisite for running VMS DECwindows [language variant] is the VMS Operating System and VMS DECwindows.

This VMS DECwindows [language variant] product provides a language interface to the DECwindows desktop environment.

This environment consists of four basic components:

- The Session Manager provides the top-level user interface to a DECwindows workstation. It performs application activation, session-wide customization, screen printing, security management and session control.
- The Window Manager provides user control for managing windows.
- FileView is a graphical interface to VMS file management that allows users to navigate through the VMS file system and perform operations on files.
- The DECterm terminal emulator provides workstation users with a traditional character cell interface for existing VMS features and applications.

A set of integrated desktop applications is also provided as a component of the DECwindows environment. The applications are:

- Bookreader - A tool for viewing the contents of books that are distributed and stored online.
- Calculator - A basic scientific calculator.
- Calendar - A personal time management system.
- Cardfiler - A hierarchical information storage application, similar to an online address and/or phone book.
- Clock - An analog and/or digital date and time display with notification by alarm.
- Compound Document Viewers - tools for reading documents containing compound text, graphics, and image data on terminals and DECwindows workstations.
- Mail - A DECwindows user interface to the VMS mail facility.
- Notepad - A simple text editor.
- Paint - A simple bitmap graphics editor.
- Puzzle - A game that challenges you to sort mixed-up puzzle tiles.

DECwindows workstation users can display PostScript® files featuring true WYSIWYG (what you see is what you get) compatibility between the display and any of Digital's PostScript® printers. Display PostScript ability is available within the Compound Document Viewers and DECwindows Mail.

For a full description of VMS DECwindows refer to the VMS Operating System Software Product Description (SPD Number 25.01.xx).
