System Support Addendum

PRODUCT NAME: VAX Decision Expert for VMS, Version 1.0 **SSA 25.D5.00-A**

HARDWARE REQUIREMENTS

Processor Support

VAX: VAX-11/750, VAX-11/780, VAX-11/785, VAX 6210, VAX 6220, VAX 6230, VAX 6240, VAX 6310, VAX 6312, VAX 6320, VAX 6330, VAX 6340, VAX 6360, VAX 8200/8250, VAX 8300/8350, VAX 8500, VAX 8530/8550, VAX 8600/8650, VAX 8700, VAX 8800, VAX 8810, VAX 8820, VAX 8830, VAX 8840, VAX 8842, VAX 8974, VAX 8978

MicroVAX: MicroVAX II, MicroVAX 2000, MicroVAX 3300/3400, MicroVAX 3500/3600

VAXstation: VAXstation 2000, VAXstation II, VAXstation 3100, VAXstation 3200, VAXstation 3500

VAXserver: VAXserver 3500/3600/3602

Requires a DECwindows display device for development.

Not supported: VAX-11/725, VAX-11/730, VAX-11/782, MicroVAX I, VAXstation I, VAXstation 8000

Block Space Requirements (Block Cluster Size = 1):

Disk space required for installation: 9,000 blocks (4,608K bytes)

Disk space required for use (permanent): 9,000 blocks (4,608K bytes)

These counts refer to the disk space required on the system disk. The sizes are approximate; the actual sizes may vary depending on the user's system environment, configuration, and software options.

The minimum supported memory for this application running in a standalone DECwindows environment with both the client and server executing on that same is 6 mg.

The performance and memory usage of DECwindows applications are particularly sensitive to system configuration. Less memory may be required on the client system (the system where the software is installed and executed) if the server (the component that displays the application) resides on another system. More memory may be required on a system with several applications running or may be desirable to improve the performance of an application.

The minimum supported memory is the minimum that will allow the product to run adequately. For optimal performance of the product, the recommended memory is 16 mg.

OPTIONAL HARDWARE

None

CLUSTER ENVIRONMENT

This layered product is fully supported when installed on any valid and licensed VAXcluster or Local Area VAXcluster configuration including VAXcluster configurations accessing a common system, without restrictions.

SOFTWARE REQUIREMENTS

VMS Operating System V5.1

This product may run in either of the following ways:

- Stand-alone execution — running the X11 display server and the client application on the same machine.
- Remote execution — running the X11 display server and the client application on different machines.

VMS DECwindows is part of the VMS Operating System but must be installed separately. Installation of VMS DECwindows gives you the option to install any or all of the following three components:

- VMS DECwindows Compute Server (Base kit; provides runtime support)
- VMS DECwindows Device Support
- VMS DECwindows Programming Support

For stand-alone execution; the following DECwindows components must be installed on the machine:

- VMS DECwindows Compute Server
- VMS DECwindows Device Support

digital software

March 1989

AE-MF75A-TE

For remote execution, the following DECwindows components must be installed on the machines:

Server Machine	Client Machine
VMS DECwindows Device Support	VMS DECwindows Compute Server (runtime support)

VMS Tailoring

Development System (and Installation):

For VMS V5.1 or later systems, the following VMS classes are required for full functionality of this layered product:

- VMS Required Saveset
- VMS Workstation Support
- Network Support

Delivery System:

- VMS Required Saveset

For more information on VMS classes and tailoring, refer to the VMS Operating System Software Product Description (SPD 25.01.xx).

OPTIONAL SOFTWARE

None

GROWTH CONSIDERATIONS

The minimum hardware/software requirements for any future version of this product may be different from the minimum requirements for the current version.

DISTRIBUTION MEDIA

Tape: 9-track 1600 BPI Magtape (PE), TK50 Streaming Tape
