Processor Restrictions

A TK50 Tape Drive is required for standalone MicroVAX 2000 and VAXstation 2000 systems.

A system configuration must have memory of 2MB of physical storage.

Disk Space Requirements (Block Cluster Size = 1):

If installing DASL:

Disk space required for installation:	30,000 blocks (15.4M bytes)
Disk space required for use (permanent):	27,000 blocks (13.9M bytes)

If not installing DASL:

Disk space required for installation:	18,500 blocks (9.5M bytes)
Disk space required for use (permanent):	15,500 blocks (8.0M bytes)

These counts refer to the disk space required on the system disk. The sizes are approximate; actual sizes may vary depending on the user's system environment, configuration, and software options.
