Software Product Description

PRODUCT NAME: DEC InfoServer Client for VMS, Version 1.0 **SPD 33.91.00**

DESCRIPTION

DEC InfoServer Client for VMS enables VAX systems running VMS Operating System V5.0 through V5.3 to access the InfoServer 100 Ethernet-based virtual disk server.

The InfoServer 100 is an Ethernet-based, high performance virtual disk server. Physical disk media and sets of logical disk blocks can be served to the network by the InfoServer. Host systems running the appropriate client software can connect to the virtual disks served by the InfoServer 100, and use them as though they were locally attached devices.

DEC InfoServer Client for VMS is used by client systems to install or upgrade software (including VMS V5.4) using the InfoServer 100-based media, access on-line documentation via Bookreader with the InfoServer 100 as its data source, or access any other CDROM-based data with a disk format supported by VMS.

Although the InfoServer 100 supports read-write access, this kit is restricted to providing read-only support to the InfoServer 100. VMS V5.4 supports read-write access to InfoServer 100. This kit can be used to upgrade to VMS V5.4, which is bundled with the full read-write InfoServer Client software.

The InfoServer Client Software is part of VMS V5.4. When a system is upgraded to VMS V5.4, the integral InfoServer Client Software will supersede this product and is fully supported by Software Product Services.

HARDWARE REQUIREMENTS

VAX, MicroVAX, VAXstation, or VAXserver configuration as specified in the System Support Addendum (SSA 33.91.00-x).

SOFTWARE REQUIREMENTS

For Systems Using Terminals (No DECwindows Interface):

VMS Operating System

For Workstations Running VWS:

VMS Operating System

For Workstations Running DECwindows:

VMS Operating System (and necessary components of VMS DECwindows)

Refer to the System Support Addendum (SSA 33.91.00-x) for availability and required versions of prerequisite software and for information regarding components of VMS DECwindows.

ORDERING INFORMATION

Software Media: QA-GGWA*-**
Software Documentation: QA-GGWA*-GZ

The InfoServer 100 includes 4 Access Licenses. Additional Access Licenses should be purchased for clients exceeding this number (4).

InfoServer Access License: QL-YTC99-AA

SOFTWARE LICENSING

The license options for the VMS Operating System includes the right to use Infoserver 100 Client Software. See the VMS Operating System Software Product Description (SPD 25.01.xx) for information regarding Infoserver 100 Client licenses. You will need a separate VMS Operating System License for each server CPU on which you will be using the software product (except as otherwise specified by Digital).

For your first installation of this software product, you must purchase as a minimum for each server:

- Single-Use License Option (a VMS Operating System License: See SPD 25.01.xx)

This software is furnished under the licensing provisions of Digital Equipment Corporation's Standard Terms and Conditions. For more information about Digital's licensing terms and policies, contact your local Digital office.

SOFTWARE PRODUCT SERVICES

This product has per-call consulting available.

The intent of the product is to allow customers access to the Infoserver 100 to Install and/or Upgrade to VMS V5.4, where they can use the full functionality of the Infoserver 100.

A variety of service options are available from Digital. For more information, contact your local Digital office.

SOFTWARE WARRANTY

Warranty for this software product is provided by Digital with the purchase of a license for the product as defined in the Software Warranty Addendum of this SPD.
