Software Product Description

PRODUCT NAME: VAX ISDN ACCESS, Version 1.1 **SPD 31.24.01**

DESCRIPTION

VAX ISDN ACCESS allows suitably configured DECnet-VAX nodes in a DECnet network to control connections to an ISDN network remotely at a DECnet node that is physically connected to the ISDN network running the VAX ISDN software. This type of node is called an ISDN connector node.

The ISDN connector node is a DECnet-VAX node that is physically connected to a supported ISDN network via a Basic Rate Access (DEC ISDNcontroller 100/DIV32) and is running both VAX ISDN software and DECnet-VAX software.

This node must be licensed for and running the VAX ISDN software. Refer to Software Product Description (SPD 31.23.xx) as well as DECnet-VAX, either end-node or full-function (SPD 25.03.xx).

INSTALLATION

Digital recommends that a customer's first purchase of this software product include Digital Installation Services. These services provide for installation of the software product by an experienced Digital Software Specialist.

Before installation of the software, the customer must:

- Previously have installed all requisite software and hardware, including terminals.

Digital's Installation Services also require that the customer must:

- Make available for a reasonable period of time, as mutually agreed by Digital and the customer, all hardware, communication facilities, and terminals that are to be used during installation.

HARDWARE REQUIREMENTS

VAX, MicroVAX, VAXstation or VAXserver configuration as specified in the System Support Addendum (SSA 31.24.00-x).

SOFTWARE REQUIREMENTS

VMS Operating System

DECnet-VAX, (either end-node or full-function) both on the connector node(s) and on the node where installation occurs.

VAX ISDN on at least one of the connector node(s).

Refer to the System Support Addendum (SSA 31.24.00-x) for availability and required versions of prerequisite software.

ORDERING INFORMATION

Software Licenses: QL-VZCA*-**
Software Media: QA-VZCA*-**
Software Documentation: QA-VZCAA-GZ
Software Product Services: QT-VZCA*-**

* Denotes variant fields. For additional information on available licenses, services, and media, refer to the appropriate price book.

SOFTWARE LICENSING

This software is furnished under the licensing provisions of Digital Equipment Corporation's Standard Terms and Conditions. For more information about Digital's licensing terms and policies, contact your local Digital office.

LICENSE MANAGEMENT FACILITY

This layered product supports the VMS License Management Facility.

License units for this product are allocated on a CPU-capacity basis.

For more information on the License Management Facility, refer to the VMS Operating System Software Product Description (SPD 25.01.xx) or the *License Management Facility* manual of the VMS Operating System documentation set.
