- Hardware capable of reading one of the distribution media upon which this product is offered.

Block Space Requirements (Block Cluster Size = 1):

Disk space required for installation	1,000 blocks (500K bytes)
Disk space required for use (permanent)	350 blocks (175K bytes)

These counts refer to the disk space required on the system disk. The sizes are approximate; actual sizes may vary depending on the user's system environment, configuration and software options.

OPTIONAL HARDWARE

IXV11/IXV1S interfaces in any combination - their number is primarily limited by the hardware of the host system. The driver is able to support up to 26 IXV11/IXV1S interfaces (excluding multiplexers).
