Processor Restrictions

A TK50 tape drive is required for standalone MicroVAX 2000 and VAXstation 2000 systems.

Other Hardware Required

Block Space Requirements (Block Cluster Size = 1):

Disk space required for installation:	500 blocks (250K bytes)
Disk space required for use (permanent):	500 blocks (250K bytes)

These counts refer to the disk space required on the system disk. The sizes are approximate; actual sizes may vary depending on the user's system environment, configuration, and software options.

OPTIONAL HARDWARE

One to eight KMV1A devices installed on a Q-bus type processor such as a MicroVAX II.

Note: The KMV1A devices are considered optional for the purpose of the installation of the VAXELN KMV1A Tool Kit. After the Tool Kit modules have been included in the system builds, execution of the system images created will require access up to 8 KMV1A devices installed on a Q-bus type processor.

It should further be noted that although 8 KMV1A devices may execute concurrently, the Tool Kit modules associated with a remote debug operation may only be included in a system build to connect one selected KMV1A on the Q-bus processor.

VAXCLUSTER ENVIRONMENT

This layered product is fully supported when installed on any valid and licensed VAXcluster* configuration without restrictions. The HARDWARE REQUIREMENTS sections of this product's Software Product Description and System Support Addendum detail any special hardware required by this product.

* V5.x VAXcluster configurations are fully described in the VAXcluster Software Product Description (29.78.xx) and include CI, Ethernet, and Mixed Interconnect configurations.

SOFTWARE REQUIREMENTS

For VAX Development Systems:

VMS Operating System V5.0 - V5.2

For MicroVAX II Development Systems:

VMS Operating System V5.0 - V5.2

VMS Tailoring

For VMS V5.x systems, the following VMS classes are required for full functionality of this layered product:

• VMS Required Saveset

For more information on VMS classes and tailoring, refer to the VMS Operating System Software Product Description (SPD 25.01.xx).

OPTIONAL SOFTWARE
