The PrintServer Supporting Host software runs on the following VAX hardware:

Any valid VAX system configuration as described above with:

- DELQA or DEQNA Ethernet Controller Interface
- 1600 BPI Magtape, TK50 tape drive, or TK70 tape drive
- System disk
  Any valid MicroVAX or VAXstation system configuration as described above with:
- DEQNA or DELQA Ethernet Controller Interface
- A TK50 or TK70 tape drive
- RD54 or RZ system disk

The PrintServer Supporting Host software requires that a minimum of one PrintServer (PrintServer 20, Turbo PrintServer 20, PrintServer 40, or PrintServer 40 Plus) is connected to the Ethernet physical channel with a transceiver cable and either an Ethernet transceiver (H4000) or the Local Network Interconnect (DELNI) or the ThinWire Ethernet Station Adapter (DESTA).

Disk Space Requirements (Block Cluster Size = 3):

Disk space required for installation:	9800 blocks 4.7 Mbytes
Disk space required for use (permanent):	9500 blocks 4.6 Mbytes

These counts refer to the total disk space (including the installation of the optional ALL–IN–1 scripts) required on the disk although a significant portion of the Supporting Host software can reside on an alternate disk. The sizes are approximate; actual sizes may vary depending on the user's system environment, configuration and software options.

OPTIONAL HARDWARE

Additional PrintServers may be supported by the supporting host.
