AV-LV00C-TE

PLEASE READ THIS COVER LETTER
BEFORE INSTALLING YOUR SOFTWARE KIT
FOR VAX DEC/MAP Version 3.0

December 1989

Dear Customer:

Enclosed is the VAX DEC/MAP version 3.0 software kit and documentation.

This kit supercedes Digital's VAX DEC/MAP version 2.1 product and meets the MAP version 3.0 specification.

It is important to note that there are major differences between VAX DEC/MAP version 3.0 and previous versions of the product. These differences are caused by changes in the MAP version 3.0 specification and previous versions of the same specification. Both the product and the specification are not backward compatible with their respective previous versions.

Changes to the specification and the product will, most likely, require existing applications to be rewritten.

The components of the VAX DEC/MAP version 3.0 product are:

- VAX DEC/MAP specific functionality (see the enclosed Software Product Description for exact details)
- VAX FTAM version 1.1
- VAX OSI Transport Service (VOTS) version 2.0

Contents of the Software Kit

Your kit includes one software distribution media (TK50 or MAG tape), containing the savesets for all three software components. It also contains documentation:

- *VAX DEC/MAP Software Installation Guide*
- *VAX DEC/MAP Introduction*
- *VAX DEC/MAP Network Manager's Guide*
- *VAX DEC/MAP MAPI Programmer's Guide*
- *VAX DEC/MAP VOTS Programmer's Guide*
- *VAX DEC/MAP FTAM User's Guide*
- *VAX DEC/MAP VOTS Problem Solving Guide*
- *DTQNA Installation and Maintenance Manual*

Release Notes

Release notes can be printed out during installation. The release notes contain information such as restrictions, incompatibilities, and changes to documentation. See the *VAX DEC/MAP Software Installation Guide* on how to access and read the release notes.

Prerequisite Software and Hardware

Operating System: VAX/VMS V5.1 or V5.2

Communications Hardware: IEEE 802.3 or IEEE 802.4 controller (DTQNA)
