Other Hardware Required

For an IEEE 802.4 connection:

A valid Q-bus (DTQNA-B*) controller

For an IEEE 802.3 connection:

A DEUNA or DELUA for operation on a UNIBUS based VAX, or BI-VAX with the appropriate UNIBUS adapter

A DEBNA for operation on a BI-bus based VAX

A DEQNA or DELQA for operation on a Q-bus based VAX

A DESVA for operation with a MicroVAX 2000 or VAXstation 2000

Memory Required:

The VMS Operating System and VAX DEC/MAP V3.0 products together require 4.0 MB of physical memory. See the VMS Operating System Software Product Description (SPD 25.01.xx) for additional memory required when other components are to be installed on a VMS system.

Block Space Requirements (Block Cluster Size = 1):

Disk space required for installation:	9,200 blocks (4,710K bytes)
Disk space required for use (permanent):	6,000 blocks (3,072K bytes)

These counts refer to the disk space required on the system disk. The sizes are approximate; actual sizes may vary depending on the user's system environment, configuration and software options.
