Software Product Description

PRODUCT NAME: DECndu (Network Device Upgrade) Utility for VMS, Version 1.0 **SPD 33.47.00**

DESCRIPTION

The DECndu (Network Device Upgrade) Utility allows users, at a host in an "Extended LAN", to upgrade the existing version of software within the DECbridge 500 and DECconcentrator 500.

The DECbridge 500 and DECconcentrator 500 are FDDI products which ship from the factory with the software preloaded. The software resides in electrically alterable memory within the hardware, and is updated via the DECndu Utility.

DECndu upgrades the existing version of software in the DECbridge 500, and DECconcentrator 500 via the "Extended LAN". An "Extended LAN" is a collection of LANs (Local Area Networks) that are interconnected and logically appear as one large Local Area Network.

General characteristics of the DECndu Utility:

- Installs and resides on host in the LAN
- Loads the new device software from the host into electrically alterable memory within the hardware device where it will remain
- Verifies that the load was successful

HARDWARE REQUIREMENTS

VAX, MicroVAX, VAXstation, or VAXserver configuration as specified in the System Support Addendum (SSA 33.47.00-x).

SOFTWARE REQUIREMENTS*

VMS Operating System

* Refer to the System Support Addendum (SSA 31.47.00-x) for availability and required versions of prerequisite/optional software.

ORDERING INFORMATION

QB-YX2A9-A* FDDI DECconcentrator 500 Software Upgrade Package for VMS

QB-YX3A9-A* FDDI DECbridge 500 Software Upgrade Package for VMS

* Denotes variant fields. For additional information on available licenses, services and media, refer to the appropriate price book.

SOFTWARE LICENSING

The DECndu software license provides the right to install DECndu on any host processor in the Local Area Network to downline load new versions of the DECbridge 500 and DECconcentrator 500 software to any licensed FDDI DECbridge 500 and DECconcentrator 500.

This software is furnished under the licensing provisions of Digital Equipment Corporation's Standard Terms and Conditions. For more information about Digital's licensing terms and policies, contact your local Digital office.

LICENSE MANAGEMENT FACILITY SUPPORT

This utility supports the VMS License Management Facility.

License units for this product are allocated on a CPU-capacity basis.

For more information on the License Management Facility, refer to the VMS Operating System Software Product Description (SPD 25.01.xx) or the License Management Facility manual of the VMS Operating System documentation set.

For more information about Digital's licensing terms and policies, contact your local Digital office.
