Read Before Installing or Using VAX PCA Version 3.0
AV–EB58F–TE

Whether you are a new or a continuing VAX Performance and Coverage Analyzer (PCA) customer, please take time to read the following information about your product.

Installation Information

PCA Version 3.0 requires VMS Version 5.3. Previous versions of PCA do not need to be installed before this version.

Release Notes Information

The release notes for PCA Version 3.0 contain important installation-related instructions and a summary of technical changes, new features, differences, corrected errors, performance enhancements, errors, restrictions, and incompatibilities.

You can read the release notes before installing PCA by invoking VMSINSTAL and following the instructions that start the installation procedure. You can also read release notes following the installation of PCA by typing:
