VMS Consolidated Software Distribution

Disc User's Guide

AA-MN64Q-RE

November 1992

This guide describes how to install, upgrade, and update the VMS operating system and how to install layered products from the VMS Consolidated Software Distribution discs. It also lists the contents of the discs.

Revision/Update Information: This is a revised document.

Overview of Disc User's Guide

About these discs

The VMS Consolidated Distribution discs for software products compose a software delivery vehicle that allows you to receive an update of consolidated software products on a regular basis.

This method of distribution does not change the content of any individual product. There is no impact on product compatibility; individual products are neither more nor less compatible as a result of consolidated distribution.

Before using the discs

Before you install, upgrade, or update the VMS operating system from your discs, or before you install a layered product, make sure you are familiar with the system hardware, including the disc drive.

In this guide

This guide describes how to:

- load the disc into a protective caddy for an RRD40 or an RRD42 disc drive
- insert the disc and remove it from an RRD40 or an RRD42 disc drive
- mount and control access to a disc
- read documentation from a disc
- register Product Authorization Keys (PAKs)
- install, upgrade, and update the VMS operating system from a disc
- install layered products from a disc
- use the CDMENU Utility to display the products on a disc and to access documentation in ASCII (text) or PostScript® format

This guide also contains a list of contents of the discs.

Product licensing agreement

The media and the software programs contained on these discs belong to Digital. Use of the software products is authorized only if you have a valid software license from Digital. Therefore, you must purchase the appropriate software license for each product you want to use from this consolidated distribution.

By electing this method of distribution, you agree to install the products contained on these discs on systems running VMS Version 5.0 and above.

Refer to your license agreements for license terms and conditions.

Ordering information

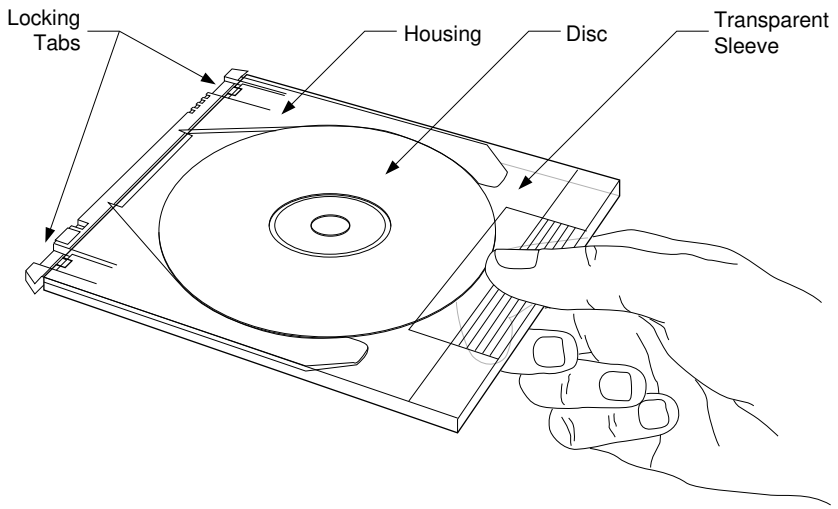
For individual product and documentation ordering information, consult your local sales representative.

® PostScript is a registered trademark of Adobe Systems, Inc.

Loading a Disc into an RRD40 Caddy

Illustration of RRD40 disc caddy

The discs accompanying this booklet must be loaded into caddies before they can be inserted into an RRD40 disc drive. The following illustration shows the components of an RRD40 disc caddy.



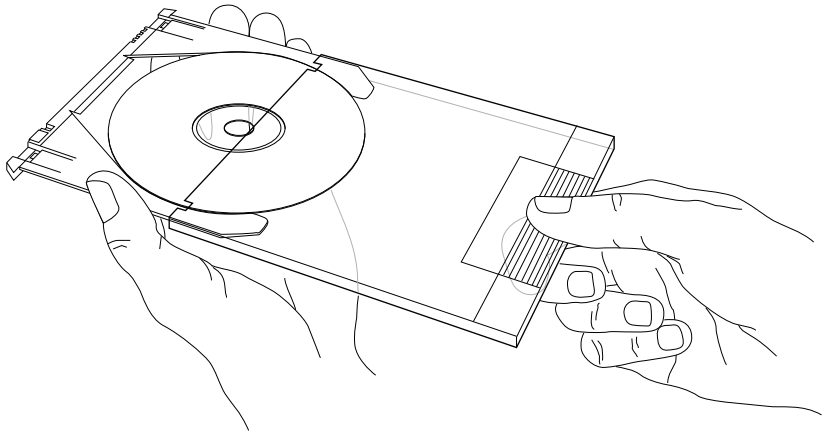
Loading a disc into an RRD40 caddy

Follow these steps to load a disc into an RRD40 caddy.

Step	Action
1	Hold the caddy as shown in the illustration above. The four notches next to the locking tab should be on the right.
2	Press the locking tabs on the caddy and pull the housing out of the transparent sleeve.
3	Remove the disc from its packaging. Grasp the disc with your free hand by placing your index finger in the center hole of the disc and your thumb on the outer edge of the disc.
4	Place the disc in the caddy housing, making sure that the labeled side faces down.
5	Slide the housing into the transparent sleeve until the locking tabs latch. Result: The disc is secured in the caddy.

Illustration of disc being loaded into RRD40 caddy

The following Illustration shows how to slide the disc housing into the transparent sleeve.

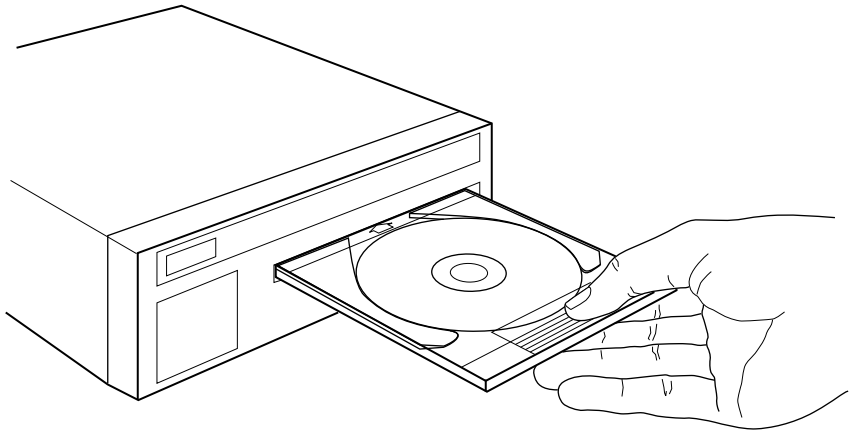


ZS-0400-M

Inserting and Removing a Disc from an RRD40 Drive

Illustration of disc, caddy, and RRD40 disc drive

The following illustration shows a disc (in its caddy) and the RRD40 disc drive.



ZS-0395-M

Inserting a disc in an RRD40 drive

Follow these steps to insert a disc into the RRD40 disc drive.

Step	Action
1	Insert the caddy into the slot in the drive.
2	Push the caddy in until it stops.
3	Withdraw the caddy. Result: The disc remains inside the drive.

Removing a disc from an RRD40 drive

Follow these steps to remove a disc from the RRD40 disc drive.

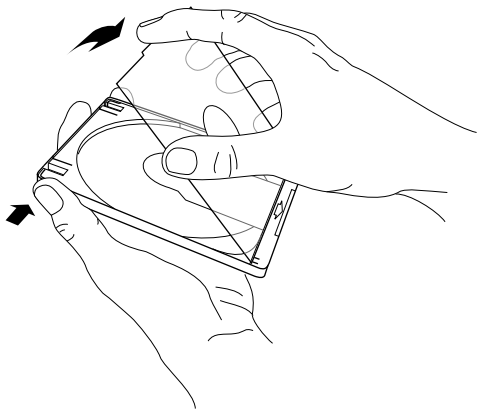
Step	Action
1	Insert an empty caddy into the slot in the drive.
2	Push the caddy in until it stops.
3	Withdraw the caddy. Result: The disc is removed from the drive and is secured inside the caddy.

Loading a Disc into an RRD42 Caddy

Loading a disc into an RRD42 caddy

The discs accompanying this booklet must be loaded into caddies before they can be inserted into an RRD42 disc drive. Follow these steps to load a disc into an RRD42 caddy.

Step	Action
1	If a protective film is on the lid of the caddy, remove the film before using the caddy.
2	Press the tabs on both sides of the caddy and lift the lid, as illustrated below.



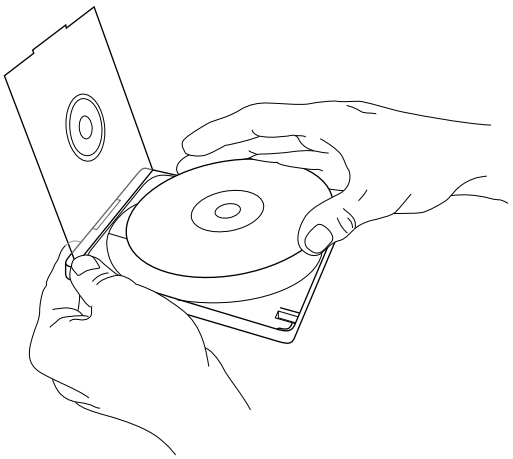
ZS-0443-MH

Step	Action
3	Remove the disc from its packaging. Hold the disc by the edges.
4	Place the disc in the caddy, making sure that the labeled side faces up.
5	Close the lid of the caddy by pressing both corners down firmly.

Loading a Disc into an RRD42 Caddy

Illustration of disc being loaded into RRD42 caddy

The following illustration shows how to place the disc in the RRD42 caddy.

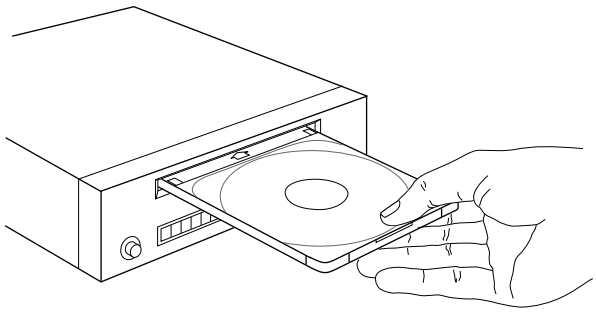


ZS-0444-MH

Inserting and Removing a Disc from an RRD42 Drive

Illustration of disc, caddy, and RRD42 disc drive

The following illustration shows a disc (in its caddy) and the RRD42 disc drive.



ZS-0445-MH

Inserting a disc into an RRD42 drive

Follow these steps to insert a disc into an RRD42 disc drive.

Step	Action
1	Insert the caddy into the slot in the drive. The disc label should be facing up.
2	Push the caddy in until it stops.

Removing a disc from an RRD42 drive

To remove a disc from an RRD42 disc drive, press the EJECT button on the drive to eject the disc caddy.

If the EJECT button is disabled by software, or the drive does not eject the caddy after you press the EJECT button, refer to the *RRD42 Disc Drive Owner's Manual* for instructions.

Mounting and Controlling Access to a Disc

Mounting procedure

To access the files on a VMS Consolidated Distribution for Software Products disc, you must mount the disc. Follow these steps to mount a disc.

Step	Action
1	Find the appropriate volume label from the following table:

Disc	Label
1	CDBIN10NOV21
2	CDBIN10NOV22
3	CDBIN10NOV23
4	CDBIN10NOV24
5	CDBIN10NOV25
6	CDBIN10NOV26
7	CDBIN10NOV27
8	CDBIN10NOV28
9	CDBIN10NOV29

2 Insert the disc into the drive.

3 Log into the system manager's account (SYSTEM).

4 Mount the disc and control user access.

IF you want to mount the disc...	THEN enter this command...
To allow access from multiple users in a VAXcluster	**MOUNT/CLUSTER** *device volume-label* Example: $ MOUNT/CLUSTER DUB0: CDBIN10NOV21
On a standalone system, or to prevent access from multiple users in a VAXcluster	**MOUNT** *device volume-label* Example: $ MOUNT DUB0: CDBIN10NOV21

For more information

For information about configuring the disc drive as a served device in a VAXcluster system, see the *VMS VAXcluster Manual*.

Registering Product Authorization Keys

Prerequisite

When you purchase a software license, you receive a standard Product Authorization Key (PAK), which lets you use the software on the discs. You must register a PAK before you install and use the software products on the discs.

The License Management Facility

For the VMS operating system and VMS layered products, use the License Management Facility (LMF) to register a PAK. For information about registering PAKs, see the *VMS License Management Utility Manual*.

Installing, Upgrading, or Updating the VMS Operating System

Deciding what to do

To decide whether you are going to install, upgrade, or update the VMS operating system, use the following table.

If your VAX computer is...	Then...
new (it has never had any version of the VMS operating system running on it)	install the VMS operating system from the disc using the VMS installation procedure
running a version of the VMS operating system and you want to destroy the contents (both VMS and user files) of the system disk	install the VMS operating system from the disc using the VMS installation procedure
not new, or if it is running a version of the VMS operating system and you do not want to destroy the contents of the system disk	update or upgrade the VMS operating system from the disc

Installing from the disc

For information about installing the VMS operating system, see the appropriate installation documentation for your computer.

CAUTION: Data Erased

The installation procedure initializes the system disk, erasing its contents. For this reason, use the installation procedure only on new VAX computers or if you want to destroy the contents of the system disk.

Installing via the InfoServer

If your CD reader is the InfoServer, use the network adapter as the boot device type.

Example:

If the target system is a 6000-400 and the network adapter is a DEMNA that is in XMI slot A, your boot command will be:

```
>>>BOOT/XMI:A/R5:E0000100 EXA0
```

When prompted for a file name, enter:

```
ISL_LVAX_055 for 6000 class machines
ISL_SVAX_055 for 4000, 3000, MICRO VAX, VAX Stations, and
  VAX/ft machines
```

These ISL files will supply a menu from which it is possible to choose a service to boot from. For VMS Consolidated Distribution, the desired service name is the label of the first CD. After you choose this service, standalone backup will boot.

After backing up saveset b, halt the system and boot from the disk that now has saveset b installed on it. It will eventually ask for the location that contains the savesets. At this point, enter DAD1. DAD1 tells the installation procedure that the remaining information will come from the InfoServer.

The next prompt is for the InfoServer Service name. At this prompt, since the installation is being done from the VMS Consolidated Distribution, enter the label of the first VMS Consolidated Distribution CDROM. This is the same name that was entered at the ISL menus.

The next question refers to the group code of the InfoServer. If a different group code was entered using the ISL menu, enter the same number here; otherwise, take the default of 0. From this point on, the installation is the same as if the load device was locally connected.

Upgrading or updating from the disc

Instructions for updating or upgrading the VMS operating system are contained in files on the disc, as well as in the release notes. To find the location of these files, refer to the Disc Contents section.

Booting VMS Standalone BACKUP

VMS Standalone BACKUP is located in the [SYSE] top-level directory on disc one. To invoke Standalone BACKUP, follow the instructions in the appropriate installation documentation for your VAX computer.

Example:

```
B/R5:E0000000   DUB0
```

Substitute the name of your CD reader for DUB0 in the example.

After you boot Standalone BACKUP, refer to the Installation and Upgrade Procedures contained in the VMS directory on the disc.

Installing Layered Products

Disc directory structure

Each software product kit has its own directory hierarchy. The name of the root directory usually corresponds to the name of the product saveset. The kit savesets are located in the KIT subdirectory. For example, the FORTRAN Version 5.3 product directory structure might include the information in the following table.

FORTRAN V5.3 Directory	File	Contents
[FORT053.KIT]		Product savesets
	FORT053.A	FORTRAN kit
[FORT053.LINE_DOCS]		ASCII documentation
	FORT053_IGUIDE.TXT	Installation Guide
	FORT053_SPD.TXT	Software Product Description
	FORT053_SSA.TXT	System Support Addendum
	FORT053_COVER.TXT	Cover letter
[FORT053.POST_DOCS]		PostScript documentation
	FORT053_IGUIDE.PS	Installation Guide
	FORT053_SPD.PS	Software Product Description
	FORT053_SSA.PS	System Support Addendum
	FORT053_COVER.PS	Cover letter

Installation guide, SPD, and SSA files

- The installation guides for most products are included in the LINE_DOCS and POST_DOCS directories.
- The Software Product Description (SPD) and System Support Addendum (SSA) files are included in the LINE_DOCS and POST_DOCS directories.

Using VMSINSTAL

Individual layered product kits are located in their own directory hierarchies. For this reason, when you install a layered product, you must use a VMSINSTAL command line that is slightly different from the one given in the product's installation guide.

When you enter the VMSINSTAL command line, specify the disc drive and the directory.

Command

@SYS$UPDATE:VMSINSTAL product-name disc-drive:[directory]

Example:

```
$ @SYS$UPDATE:VMSINSTAL FORT053 DUB0:[FORT053.KIT]
```

For more information

Table 1 identifies the directory for each product on a disc. You can also use the CDMENU Utility to get the directory names.

Using the CDMENU Utility

Overview

The CDMENU Utility provides a menu interface that helps you perform the following tasks easily:

- Display a master index of all products
- Display new and updated products
- Fetch or copy release notes
- Display and print installation guides and other documentation
- Install products

Before invoking the CDMENU Utility

Before invoking the CDMENU Utility, define the logical name CD$DIRECTORY in your LOGIN.COM file.

Example 1:

```
$ DEFINE CD$DIRECTORY DUB0:[CDROM]
```

To access multiple discs, define CD$DIRECTORY as a search list before you invoke the CDMENU utility.

Example 2:

```
$ DEFINE CD$DIRECTORY DUB0:[CDROM],DUB1:[CDROM],DUB3:[CDROM]
```

In addition, define the logical CD$EDIT to indicate the editor to use while displaying documentation on your screen.

Example 3:

```
$ DEFINE CD$EDIT LSE
```

Invoking the CDMENU Utility

To invoke the CDMENU Utility, enter the following command at the system prompt:

```
$ RUN CD$DIRECTORY:CDMENU
```

Disc Contents

On these discs

Digital has provided the following information on the discs:

- Upgrade and update procedures for the VMS operating system
- Layered product kits
- Installation guides
- Cover letters
- Software Product Descriptions (SPDs)
- System Support Addenda (SSAs)

The files associated with each product are listed in its directory on the disc.

Not on these discs

Not all products are on these discs. Products that are not included on these discs should be ordered separately. In future releases of VMS Consolidated Software Distribution, Digital intends to include such products as they become available.

Release notes and documentation

Release notes for layered products are included in the kits, and may be retrieved using the menu system or by using VMSINSTAL OPTIONS N. All other documentation for products on these discs must be ordered separately.

"Special notes" files

Two files in the [CDROM] directory provide ''special notes'' for some products on this release. Please review the contents of these files because they may provide useful information for a product.

For more information

Table 1 lists all products and versions that are included on this release. For your convenience, this User Guide is available in the [CDROM] directory in PostScript format. The User Guide file name is USER_GUIDE.PS.

Printing the Disc Contents

Types of files

The files that you can print are available in two formats:

- ASCII (text)
- PostScript

Printing PostScript files

Be sure to print PostScript files on a PostScript printer.

Printing the special notes and product listing files

Use this table to print the special notes files or a listing of products.

IF you want to print...	AND...	THEN enter this command...
The product listing file in ASCII text format	CD$DIRECTORY is not defined	`PRINT device-name:[CDROM]CDMASTER_INDEX.TXT`
	CD$DIRECTORY is defined	`PRINT CD$DIRECTORY:CDMASTER_INDEX.TXT`
The product listing file in PostScript format	CD$DIRECTORY is not defined	`PRINT device-name:[CDROM]CDMASTER_INDEX.PS`
	CD$DIRECTORY is defined	`PRINT CD$DIRECTORY:CDMASTER_INDEX.PS`
The special notes file in ASCII format	CD$DIRECTORY is not defined	`PRINT device-name:[CDROM]SPECIAL_NOTES.TXT`
	CD$DIRECTORY is defined	`PRINT CD$DIRECTORY:SPECIAL_NOTES.TXT`
The special notes file in PostScript format	CD$DIRECTORY is not defined	`PRINT device-name:[CDROM]SPECIAL_NOTES.PS`
	CD$DIRECTORY is defined	`PRINT CD$DIRECTORY:SPECIAL_NOTES.PS`

The Master Index for the Discs

Explanation of table columns

The columns in Table 1 below contain information as follows:

Column Name	Column Contents
Product Name	The name of the product.
Vers	The version number of the product.
UPI	The unique product identifier.
Status	**New** indicates that the product is a new addition to the disc. **Updated** indicates the product has been updated since the last issue.
CD	The number of the disc on which the product is located.
Directory	The name of the product's directory on the disc.

A Note About Document Versions and Product Versions

In some cases, the version numbers listed in the Online Product Documentation table may not coincide with the version numbers of the books on the disc. However, the online documentation does support the most current shipping version of the product.
